

GUILLAUME PIEN

PharmD & Senior Data Professional

guillaume.pien@outlook.com · +1-647-872-9047 · Ottawa (ON) · [linkedin.com/in/gpn](https://www.linkedin.com/in/gpn) · github.com/gpn64/Portfolio

Summary

Pharmacist by training, I've spent 10+ years working in pharma across drug development, regulatory, operations, and commercial analytics. I like turning complex data into clear, practical insights, using tools like Power BI, SQL, Python, and Snowflake.

What I bring is a mix of domain knowledge and hands-on analytics which helps me connect the science, the business, and the day-to-day reality of how teams work. I'm especially interested in building solutions that people actually use and trust.

Skills

BI & Analytics Engineering: Power BI (PL-300) · DAX · SQL · Snowflake · Python · Excel · Predictive Modeling

Power Platform: Power Automate · Power Apps · SharePoint · Dataverse (architecture)

Data Modeling: Star schema design · Complex data modeling · ETL pipeline development · Performance optimization · Report automation

Pharma Domain: Sales & Marketing analytics · Therapeutic category analysis · Portfolio mix · Regulatory data · GxP / GMP · KPI framework design

Delivery: Agile · UAT design & execution · Stakeholder management · Executive storytelling · Mentoring · Technical documentation

Experience

Senior Decision Science Analyst (BI Developer) | Sanofi

Jan 2024 - Present · Toronto, ON (Remote)

- Designed and maintained Power BI dashboards regulatory KPIs, all wireframed in Figma prior to development and adopted by global leadership as primary decision-support tools.
- Architected a Health Authority Approval Date Prediction Model (Python, XGBoost), reaching 90% prediction accuracy for regulatory milestones across global markets.
- Led data governance and data quality initiatives, overseeing 27 QC processes across 25M+ data rows for 500–1,000 GRA users, enabling reliable compliance tracking and audit readiness at scale.
- Built Power Automate workflows to orchestrate data movement across databases and SharePoint environments, including a ticket management system for ancillary documents with dynamic population and duplicate validation logic against SharePoint Lists (300 unique monthly users on average, 60 records created/day).
- Developed Power Apps prototypes for internal tooling, including one presented to top management as proof-of-concept for operational process improvement.
- Designed and maintained cross-database mapping tables for product hierarchies and country alignments, resolving granularity conflicts across multiple source systems to ensure consistent reporting across global markets and functions.
- Mentored two junior BI developers and a VIE as part of their development plan.
- Co-lead the GRA Power BI Community of Practice, gathering 300+ participants in our biannual forum, organizing case study sessions, training users on Power BI best practices, and driving a data-driven culture across the department.

Principal Business Analyst (BI Developer) | Sanofi

Jul 2020 - Dec 2023 · Toronto, ON (Remote)

- Built advanced analytics dashboards and workflow automations on an integrated cloud-based platform (Veeva Vault RIM), enabling leadership to track performance across therapeutic portfolios.
- Drove a 75% improvement in data compliance rates through targeted remediation initiatives, directly strengthening regulatory readiness and patient safety posture.
- Applied process mining techniques to identify bottlenecks and waste, improving process performance by 25%.

- Translated complex business requirements from regulatory and patient-care teams into scalable BI and data science solutions, reducing time-to-insight for segmentation analysis.
- Led collection of user requirements, managed project timelines, and resource allocation.

Regulatory CMC Associate | Sanofi

Jun 2018 - Jun 2020 · Toronto, ON

- Conducted regulatory impact assessments for product and process changes across CA, US, EU, and international markets.
- Designed and deployed KPI dashboards for global regulatory leadership, improving compliance visibility and reporting efficiency.
- Contributed to metadata management through the development of regulatory glossaries and data dictionaries: foundational assets for downstream BI work.

Production & QC Manager | Sanofi & LFB Biomédicaments

May 2015 - Jun 2018 · Paris Area, France

- Managed teams of 7–20 production and QC technicians across GMP-regulated manufacturing environments, with full accountability for team performance and daily operations.
- Built and maintained production KPI dashboards monitoring performance, yield, quality, and environmental metrics — including for an annual output of 20M syringes.
- Performed QC data analytics and statistical studies, achieving a 10% reduction in quality deviations through targeted action plans.
- Contributed to the implementation of SAP Athena for Production Planning, enhancing operational efficiency and aligning data operations with business objectives.

Education

PharmD, Major in Drug Development & Manufacturing (2009-2015) | University of Caen, France

M.Eng. in Project & Supply Chain Management (2014-2015) | École Centrale Paris, France

MBA - Business Administration (2013-2015) | IAE of Normandy, France

M.Sc. in Drug Design (2012–2013) | University of Caen, France

Certifications

Microsoft Power BI Data Analyst Associate (PL-300) | Microsoft

Data Scientist Professional Certificate | IBM

Data Analyst Professional Certificate | IBM

Business Intelligence Analyst Professional Certificate (in progress) | IBM

Yellow Belt Lean Six Sigma | École Centrale Paris

Project Management Level D | IPMA

Languages

French (native) · English (professional fluency)

Volunteering

Guest Lecturer, Industrial Pharmacy Program - Université de Caen, France (ongoing)

Teaching "Digital Transformation in Pharmaceutical Industry" covering how data, analytics, and AI are reshaping the pharma industry for graduate students in the Industrial Pharmacy track.
